The New York Tribune has been autho rized, by George Bruce, Esq., to offer a pre-mium of \$1000 to the first inventor who shall coastract and submit for judgment, a press, which will throw off five hundred arge imperial sheets per hour, and can be built and sold for \$500. The cost of working the press is not to be greater than that of the Smith press—the patent right, of course, to remain with the inventor.

The Cheap Postage Bill.

This bill, passed at the recent session ngress, will go into effect on the first July. From the rate established by the bill which we publish in another column, it will be seen that weekly papers circulate in the county where they are published, free of publication, the postage is only twenty that per year. This is an excellent provious, and will be an inducement to encour the home papers. We hope our citizen will profit by the hint given them by Congress, and stand up to the support of their own papers.—[St. Joseph Gazette.
